

Experience our experience.

Shouldn't the people who manage your plane love it as much as you do?

At OCR Aviation, we're dedicated to elevating your aviation experience.

Our custom management programs can be personalized to fit your needs.

Our aircraft management team delivers operational efficiency and cost savings, while upholding the highest standards of compliance and safety.

Experience the exceptional value, personal touch, and direct communication that allows you to focus on what matters most. Flying.

Most of our clients buy a plane to save time, enjoy flying, and simplify their life. Not to be consumed by the details of aircraft management. So, they leave the details to OCR Aviation, ensuring the value of their aircraft is protected, and it's flight-ready when needed.

As a community of owner pilots, we have an intimate understanding of our clients' concerns regarding the care of their aircraft. OCR Aviation has the experience, resources, and experts necessary to ensure your aircraft is ready when you need it.

Owning an airplane isn't complicated, but it takes time to manage all the details.

Scheduled and unscheduled maintenance, hiring pilots, instructors, cleaning crews, purchasing fuel, and securing ground support, are just some of the specifics our aircraft management team performs to ensure your safety and save your valuable time.

OCR maximizes the value your aircraft brings to your life with an efficient full team effort. Set your aircraft management on autopilot with OCR Aviation!

60,000 SQ FT.

OCR Aviation is a one-stop service partner to our customers. We can assist you with your next acquisition or sale, maintenance, detailing, aircraft management, pilot training, and more.

Based at the Long Beach Airport for over 30 years, our private fbo is a private, secure, family friendly environment without the hassle of transient parking and crowded terminals.
